

Contents

Introduction	p.	11
1. Artificial Intelligence in Medicine and Healthcare: Past, Present, Future (<i>Carlo Combi, Giuseppe Pozzi</i>)	»	13
2. Explainable Artificial Intelligence (<i>Paolo Giudici, Emanuela Raffinetti</i>)....	»	27
3. A Basic Glossary of Machine Learning (<i>Arianna Dagliati, Lucia Sacchi</i>) .	»	41
4. From Neural Networks to Deep Learning, a brief introduction (<i>Stefano Ramat</i>)	»	57
5. Deep Learning for Medical Imaging in the Era of Precision Medicine (<i>An- tonio Brunetti, Giacomo Donato Cascarano, Vitoantonio Bevilacqua</i>)	»	75
6. Natural language processing methods for clinical text (<i>Natalia Viani, Su- mithra Velupillai</i>)	»	101
7. Visual Programming and Interactive Visualisations for Gene Expression Data Analytics in Orange (<i>Jaka Kokošar, Martin Stražar, Marko Toplak, Aleš Erjavec, Lan Zagar, Vesna Tanko, Ajda Pretnar, Pavlin Poličar, Janez Demšar, Gad Shaulsky, Blaž Zupan</i>)	»	121
8. Opening the Black Box: Explanation and Trust in Medical-Based AI-Sy- stems (<i>Allan Tucker</i>)	»	135
9. Decision making, values and utilities (<i>Enea Parimbelli, Silvana Quaglini, Riccardo Bellazzi</i>)	»	147
10. Reinforcement learning: From biology to machine learning (and back) (<i>Vieri Giuliano Santucci</i>)	»	169
11. AI for decision-support in diabetes management (<i>Martina Vettoretti, Gia- como Cappon, Andrea Facchinetti, Giovanni Sparacino</i>)	»	187
12. Towards AI powered chatbots for mental health (<i>Manuel Ottaviano, Sergio Gonzalez, Javier Rojo Lacal, Maria Teresa Arredondo, Giuseppe Fico</i>) ...	»	207

13. Neuromorphic Sensing and Perception (<i>Chiara Bartolozzi, Arren Glover</i>)	p.	227
14. Neurobotics: Motor control principles for robots (<i>Egidio Falotico, Hari-Teja Kalidindi</i>)	»	243
15. Data-driven Spiking Neural Networks for Neurobotics (<i>Alessandra Pedrocchi, Alice Geminiani, Alberto Antonietti, Claudia Casellato, Egidio D'Angelo</i>)	»	265
16. A functional approach to the regulation of AI (<i>Andrea Bertolini</i>)	»	285
17. AI and decision-making: dilemmas of regulation and methodological implications (<i>Amedeo Santosuosso</i>)	»	297
