

# Contents

1. Electrophysiological and neuroimaging approaches for the investigation of functional brain networks ( <i>Eleonora Maggioni, Stefania Coelli, Federica Goffi, Anna Maria Bianchi</i> ).....	p.	11
2. Detection of interregional brain interactions from time series data ( <i>Teo Fantacci, Chiara Ciucci, Matteo Pizzinga, Eleonora Russo</i> ).....	»	23
3. From the neurophysiology of the spinal cord to artificial sensorimotor control ( <i>Natalija Katic Secerovic, Stanisa Raspopovic</i> ) .....	»	35
4. Neural basis and dynamics of touch: insights for biomimetic bionics ( <i>Giacomo Valle, Dillan Prasad</i> ).....	»	45
5. Modeling Neuronal Diversity and Connectivity with Brain-on-a-Chip Systems ( <i>Francesca Callegari, Fabio Poggio, Ilenia Donati della Lunga, Valerio Barabino, Letizia Cerutti, Mariateresa Tedesco, Paolo Massobrio, Martina Brofiga</i> ) .....	»	53
6. Human neuronal networks on MEAs: a robust tool to study disease phenotype <i>in vitro</i> ( <i>Marta Cerina, Monica Frega</i> ) .....	»	65
7. Microcircuit modeling: the cerebellar usecase ( <i>Claudia Casellato</i> ) .....	»	75
8. Brain circuit models and modelling neuropathologies ( <i>Alberto Antonietti, Benedetta Gambosi, Alice Geminiani</i> ).....	»	87
9. Full-scale models of hippocampal microcircuits to simulate entire brain regions ( <i>Jonathan Mapelli, Daniela Gandolfi</i> ).....	»	101
10. Hybrid models of neuromodulation: a modular framework to advance neural engineering and neuroprosthetics ( <i>Simone Romeni, Silvestro Micera</i> ) .....	»	111
11. Touch science and neuromorphic tactile sensors ( <i>Calogero Maria Oddo</i> ) .....	»	123
12. Innovative Microtransducers for Multifunctional Activity Monitoring of Electroactive Cellular Aggregates ( <i>Andrea Spanu, Fabio Terranova, Fabrizio Antonio Viola, Danilo Pani, Sergio Martinoia, Annalisa Bonfiglio</i> ) .....	»	135

13. Implantable active dense CMOS neuroelectronics for brain activity recordings ( <i>J.F. Ribeiro, G.N. Angotzi, Luca Berdondini</i> ) .....	» 147
14. Deep brain stimulation for locomotor network dysfunctions in Parkinson's disease ( <i>Chiara Palmisano</i> ).....	» 155
15. Mobile Brain/Body Imaging for rehabilitation: challenges and opportunities ( <i>Fiorenzo Artoni</i> ).....	» 175
16. Basal ganglia network dysfunctions and deep brain stimulation ( <i>Salvatore Falciglia, Ahmet Kaymak, Alberto Mazzoni</i> ).....	» 185
17. Deep brain stimulation and the person ( <i>Mattia Pacetti</i> ) .....	» 197
18. Trustworthy AI in neuroengineering: from data management to ethics assessment ( <i>Sara Moccia</i> ).....	» 205
19. Transcranial brain stimulation: currents, ultrasounds and magnets ( <i>Guglielmo Foffani</i> ).....	» 213
20. Non-Invasive Brain Stimulation (NIBS): evolving concepts for clinical applications ( <i>Alberto Priori, Matteo Guidetti, Natale Maiorana, Costanza Masetti, Mauro Treddenti, Sara Marceglia</i> ).....	» 223
21. Bidirectional brain-machine and brain-body interfaces for upper limb movement restoration ( <i>Solaiman Shokur, Silvestro Micera</i> ).....	» 251
22. Functional Electrical Stimulation and robotics: two complementary approaches to foster motor re-learning ( <i>Francesca Dell'Eva, Tommaso Del Grossi, Marta Gandolla, Emilia Ambrosini</i> ) .....	» 265
23. Spinal cord stimulation assisted by motor rehabilitation training for restoring motor function ( <i>Luigi Albano, Daniele Emedoli, Edoardo Pompeo, Cinzia Mura, Lina Raffaella Barzaghi, Carlo Marco Mandelli, Pietro Mortini</i> ).....	» 279
24. A wearable neuroprosthetics system to restore natural thermal sensations in upper limb amputees ( <i>Francesco Iberite</i> ).....	» 287
25. Visual prostheses: learned lessons and future perspectives ( <i>Diego Ghezzi</i> ) .....	» 295
